

PROJECT DESIGN PHASE – II

Solution Requirements (Functional & Non-Functional)

Date: 30 September 2026

Team ID: Msu207Team8-6ab24dfd5bdbdc53c88f47

Project Name: Implement Client Script and UI Policy

Maximum Marks: 4 Marks

Functional Requirements

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Client Script Implementation	Create Client Script for form validation Validate user input Display validation messages
FR-2	UI Policy Implementation	Create UI Policy based on form conditions Make fields mandatory Make fields visible or hidden
FR-3	Dynamic Field Control	Change field behavior based on user input Make selected fields read-only Enable or disable fields based on conditions
FR-4	Form Validation	Validate required information before submission Prevent submission when required conditions are not satisfied Allow submission when valid information is provided
FR-5	User Interaction	Provide clear feedback to the user Display appropriate messages for invalid input Update form fields dynamically

Non-Functional Requirements

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	The form should be simple, clear, and easy for users to interact with.
NFR-2	Security	User input should be validated and the system should follow appropriate access and configuration controls.
NFR-3	Reliability	Client Scripts and UI Policies should consistently perform according to their defined conditions.
NFR-4	Performance	Form validation and field changes should execute quickly without unnecessary delay.
NFR-5	Availability	The implemented form functionality should be available whenever the

NFR No.	Non-Functional Requirement	Description
NFR-6	Scalability	ServiceNow application is accessible. The solution should allow additional Client Scripts and UI Policies to be added as project requirements grow.
